DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “414” has been used to designate both **anti-slip ring** and **second wrench**. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **means for measuring an instantaneous applied torque** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: reference character "**414**" has been used to designate both **anti-slip ring** and **second wrench** on page 14, lines 4,6.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3723

In claim 1, lines 2,3 the expression **“the means for measuring an instantaneous applied torque”** lacks antecedent basis;

in lines 3,4, delete the expression **“a head suitable for co-operating with a screw fastener”**;

in lines 4,5, the expression **“the instantaneous angle of rotation”** lacks antecedent basis;

in lines 7,8,15,16, the expression **“the instantaneous traction force”** lacks antecedent basis;

in line 9, the expression **“the measured instantaneous values of torque”** lacks antecedent basis;

in lines 10,11, the expression **“the stored characteristics of the screw fastener”** lacks antecedent basis;

in line 14, the phrase **“the transition”** lacks antecedent basis;

in lines 14,15, the expression **“the elastic deformation range”** lacks antecedent basis;

and in lines 15,17,18, the expression **“the plastic deformation range”** lacks antecedent basis.

In claim 2, line 2, the phrase **“the instantaneous force”** lacks antecedent basis.

In claim 3, lines 2,3,4, the phrase **“the instantaneous coefficient of friction”** lacks antecedent basis;

in line 12 the term **“the washer”** lacks antecedent basis;

in line 13, the term **“the bolt”** lacks antecedent basis; and

in line 15, the term **“the fastener thread”** lacks antecedent basis.

Art Unit: 3723

In claim 4, lines 3,4, the phrase “the instantaneous coefficient of friction” lacks antecedent basis.

Allowable Subject Matter

Claims 1-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

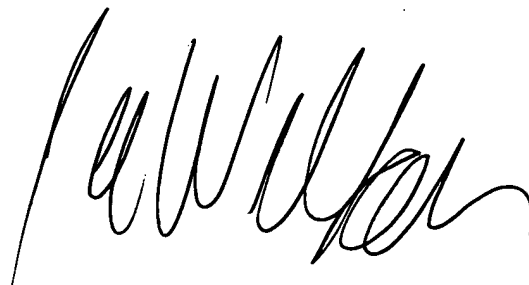

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Aspers, Van Naarden, Soshin et al., Schonberger et al., Jenkins disclose torque wrench respectively.
